- **Controller:** To Power Lights and Disc Brake Cut-Off Switch with Torque Sensing Feature.
- **Total Watts:** Max Peak Output of 1750 Watts; Made for Maximum Torque and Power.

• SPEED / DISTANCE:

- **Max Speed:** 30-35mph
Distance Calculated: 31.5 AH x 48V= 1512Watt hours divided by 25 =60.48 Miles per Charge
- **Maximum Torque:** 180 NM

• ADDITIONAL PRODUCTS:

- [Optional Gyro Hitch Pulling Patent-Pending Adaptor](#): to allow wheeled carts and caddies to attach to bike rear rack.
- [Optional UltraTRX 4 Wheel Cart](#): This cart not only has four wheels which are specially designed to go up and down and over any terrain. It also has puncture-proof, (foam-filled), extra-wide tires at 6" wide and 16" diameter. This cart can not only be used for backcountry hunting or fishing but with its extra-wide tires, it can also be used to haul beach gear, and sports equipment, and since it folds up, it will fit in almost any vehicle. Our [GenerTRX Power Generation System](#) can be applied to all four wheels.

Warranty: One Year Manufacturer's Warranty on Electronics; Two Years on Frame and Fork.
